Presented by Deborah Laze

SCS IMPLEMENTATION UPDATES

Putting Previous Meeting Suggestions Into Action

AGENDA

- Update AppointmentQuest Schedule Tabs
  - Reorganize and refresh scheduling categories to better reflect current services
- Draft End-of-Year Client Feedback Email
  - Compose & send mass email to past clients who haven’t completed the feedback survey previously
- Automate Feedback Survey Delivery
  - Using Microsoft Power Automate to send feedback survey emails automatically after each consultation

APPOINTMENTQUEST SCHEDULE TABS

APPOINTMENTQUEST SCHEDULE TABS

The schedules page in AppointmentQuest currently lists all booking categories, including consultant names and topic areas.

Proposed Updates

- Review and replace outdated or redundant tabs
- Ensure all active consultants have current descriptions
- Standardize naming and description format across consultants and topics for improved readability
  - **Deborah Laze — Master's Student** Specializes in data visualization techniques, R, and honours theses. Available to help with: R, Tableau, and honours theses data analysis. Consultations are held via Zoom.

MASS CLIENT FEEDBACK EMAIL

DRAFT EMAIL TEMPLATE

Subject: SCS Consultation Survey: We'd Love Your Feedback

Dear Client,

Thank you for using York University's Statistical Consulting Service. Your feedback helps us improve. If you haven't already, we'd appreciate it if you could complete our brief survey: **Feedback Survey Link**

It should only 2-3 minutes of your time. Your responses help us better serve you and future clients.

Best regards,

The SCS team

MASS CLIENT FEEDBACK EMAIL

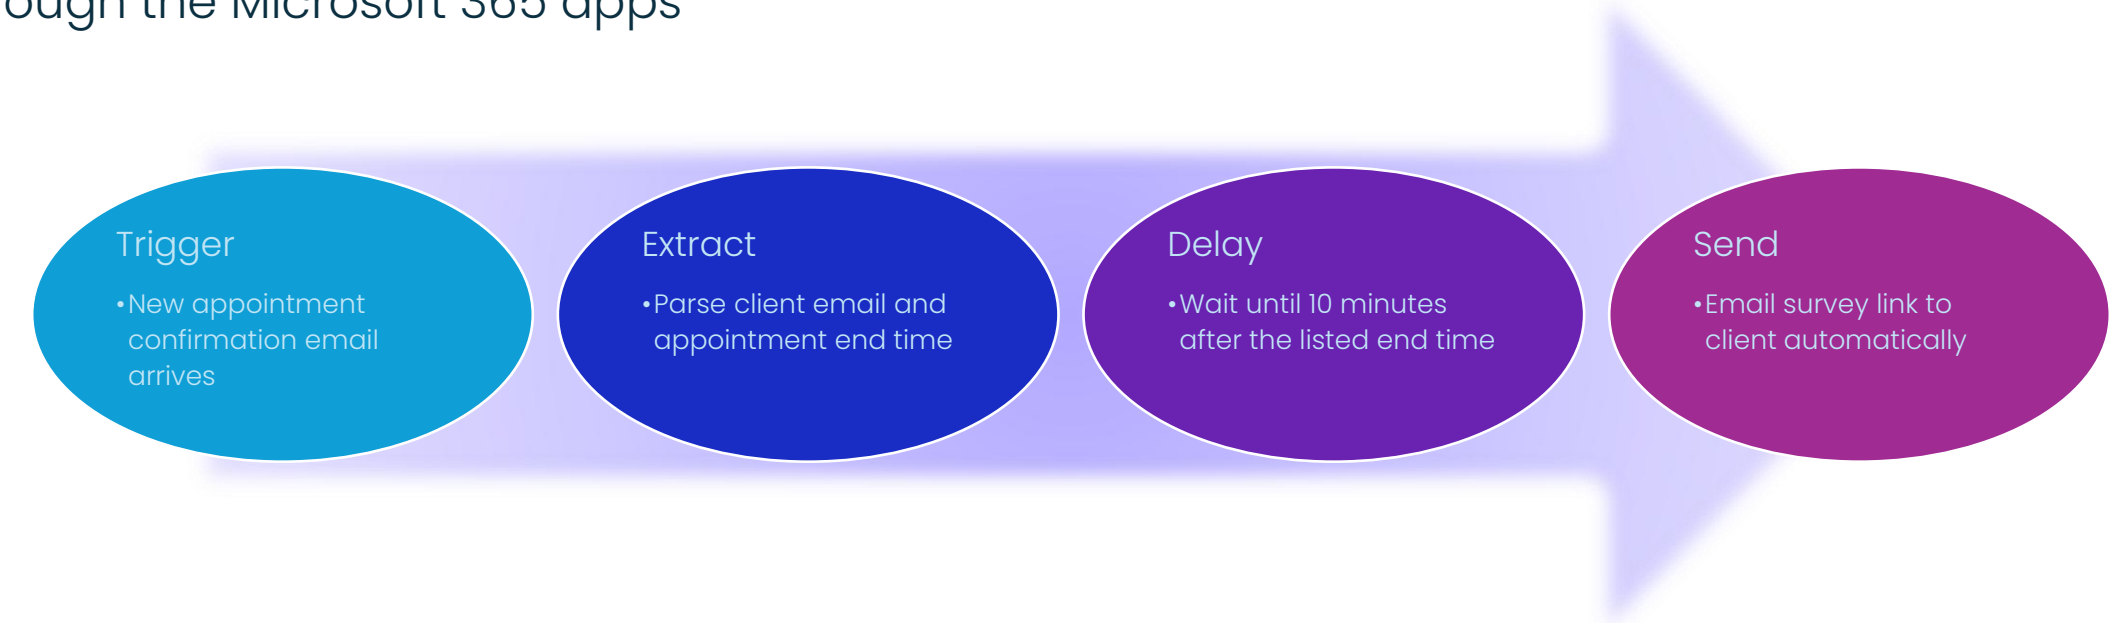
Goals

- Gaining more feedback on SCS
- Hearing from people who haven't already shared their thoughts

AUTOMATING THE FEEDBACK SURVEY

AUTOMATING THE FEEDBACK SURVEY

Power Automate can help eliminate manual follow-ups and is already available to us through the Microsoft 365 apps

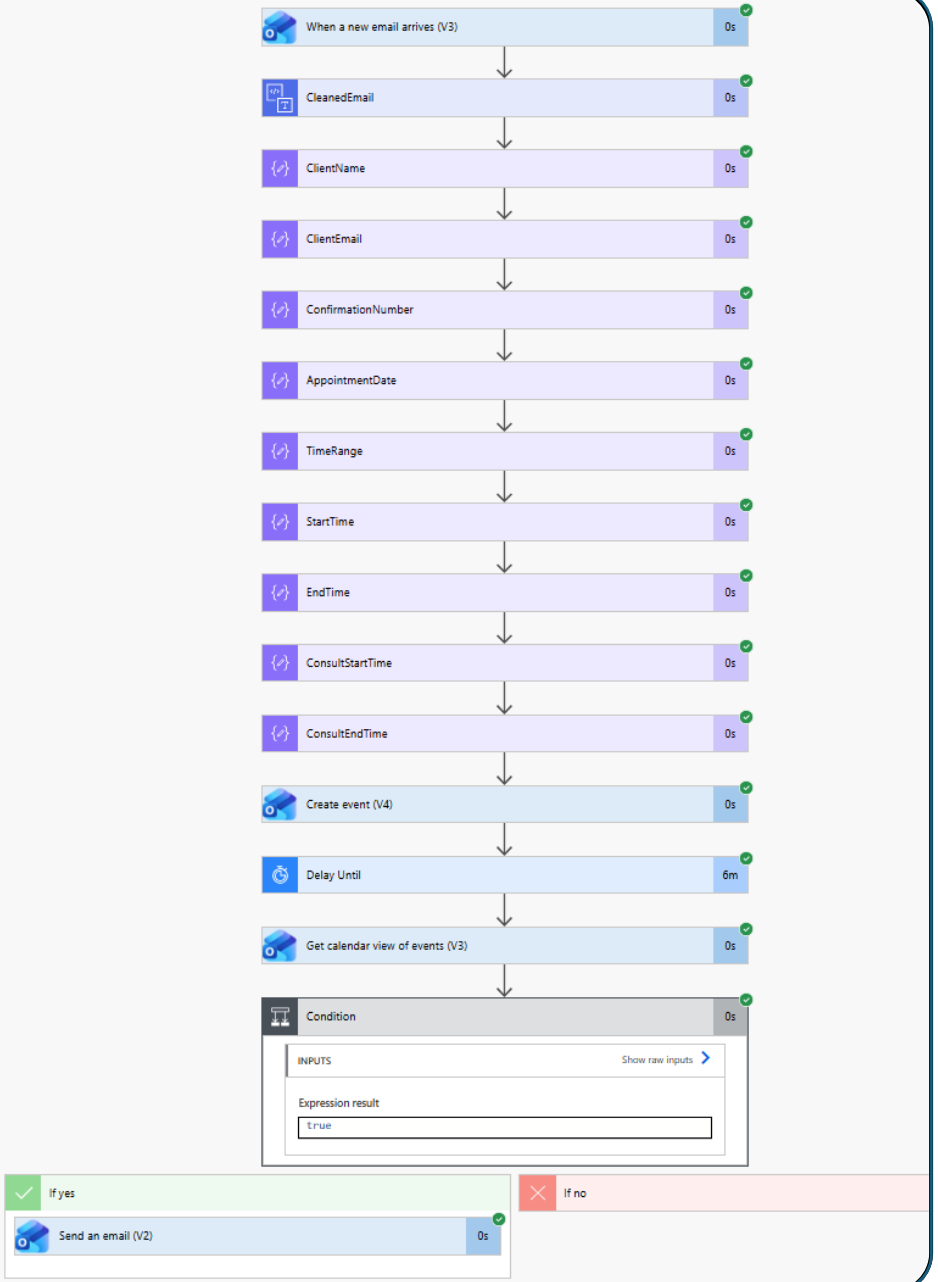


Why Automate?

✓Consistent follow-up timing ✓ No manual tracking needed ✓ Higher survey response rates

AUTOMATING THE FEEDBACK SURVEY

- Email Trigger to a Central Inbox
- Variable Extraction
- 10-minute Delay Post-Session
- Verification Check with Calendar
  - Ensures that individuals who ultimately had no appointment aren't needlessly asked to fill out the survey
- Send
  - Once the appointment's occurrence has been confirmed, the feedback survey email is sent



AUTOMATING THE FEEDBACK SURVEY

AppointmentQuest alternatives can also help address this issue. Combining Microsoft Bookings & Power Automate can help automate:

- Collection of customer demographics
- Calendar invitations with Zoom links
- Appointment reminders to address no-shows
- Follow-up emails
- And more…

Microsoft Bookings mock-up:

NEXT STEPS

- Audit AppointmentQuest Tabs
  - Individually update consultant profiles using a specific format
  - Update topic profiles based on most common consulting issues
  - Archive inactive categories
- Finalize & Send Feedback Email
  - Approve email template
  - Identify clients who haven’t responded
- Deploy Power Automate flow
  - Test flow with sample appointments
  - Verify consistent timing for email delivery
  - Implement in time for the next academic school year
- Monitor & iterate
  - Track survey response rate

DISCUSSION

- Thoughts on the consultant profile descriptions?
- Any edits to be made for the mass feedback email template or who we should be sending it to?
- Any suggestions to add to the Power Automate flow that would make your lives easier as consultants and allow you to focus on the harder, more invaluable work?
- Is AppointmentQuest still the right tool for us?
